

Figures

- 1-1 Oswego River Basin
- 1-2 Municipalities in the Cayuga Lake Watershed
- 2-1 Percent of Agriculture of Major Cayuga Lake Watersheds
- 2-2 Estimated Annual TSS Loss Via Runoff
- 2-3 Total Phosphorus Concentration
- 3-9-1 Recommended Riparian Zone

Tables

- 2-1 Percent of 150 foot Riparian Zone with Developed Land Use
- 2-2 Subwatershed Areas with Highest Potential for NPS Pollution
- 2-3 Estimated Annual Sediment Loss for Roadways and Restoration Priorities
- 2-4 Estimated Phosphorus Budget
- 3-9-1 Percent (%) Land-Use within 150 Ft. Riparian Corridor
- 3-9-2 Percent Total Wetlands Areas to Total Subwatershed Area
- 3-9-3 Percent (%) Developed Area Land Use Within 150 Ft. Riparian Corridor

Maps

- 1-1 Cayuga Lake Watershed
- 2-1 Major Subwatersheds
- 2-2 Streambank Inventory by Subwatershed
- 2-3 Land Use Along Riparian Corridors
- 2-4 Potential for NPS Based on Land Use and Hydrologic Characteristics
- 2-5 Estimated Potential Roadbank Sediment Loss by Subwatershed
- 3-9-1 Cayuga Lake Watershed Wetlands
